

COVID 19 SAFETY ANNOUNCEMENT

FROM DR. AMY SLAGLE, MD

PUBLIC HEALTH OFFICER, MITW INCIDENT COMMAND

APRIL 24, 2020

- **DUE TO CONFUSING MESSAGING FROM PRESIDENT TRUMP, THE FOLLOWING CLARIFICATIONS ARE REQUIRED:**

1. Do not attempt to inject, eat, or drink bleach, any product containing bleach, or any disinfectant. This would include brand names like Purell, Lysol, 409, Chlorox, or any product that states it is a disinfectant. These products can all cause **DEATH inside your body.**

2. Do not use a tanning bed or purposely expose yourself to sunlight in efforts to kill Covid 19. The type of ultraviolet (UV) light wave which sterilizes medical equipment is UV-C. It is a different from

UV light which reaches the earth from the sun and different than UV light in tanning beds. Sunlight and tanning bed light cause skin cancer and do not kill Covid 19.

- **RISKS OF STOPPING SOCIAL DISTANCING:**

- 1. Do not go in restaurants, bars, or other businesses which decide to defy Wisconsin law. You will greatly increase your risks of getting Covid 19 and spreading it to others, including elders and loved ones.**

- 2. Cases of Covid 19 are increasing in Green Bay/Brown County at a fast rate. If people from that area decide to come to Shawano County where people are openly defying Wisconsin law, they will bring virus with them. They can spread it to you without knowing they have it.**

3. Ignore what a small but loud minority of people who do not care about the health of others are deciding to do. Stay home, continue to social distance, act out of love, prove you are informed and educated about Covid 19.

4. Remember Covid 19 kills many people. If 100 people get it, 3-5 of them will die from it. Many people in their 20's, 30's, and 40's are dying from it. If 500 Menominees get Covid 19, we can expect 15-25 to die from it. That's a lot. That's people you know and love, that could be you.
