

Narcan (Naloxone) and Fentanyl Test Strips

are available

FREE OF CHARGE

NO QUESTIONS ASKED

Harm reduction is a set of practical strategies and ideas aimed at reducing negative consequences associated with drug use.

What is narcan?

Narcan is a medicine that can help people who are overdosing on an opioid. Opioids include prescription medications, heroin, and fentanyl. Sometimes other drugs, including cocaine and methamphetamine, are mixed, or laced with fentanyl.

Naloxone temporarily reverses the effects of an overdose from opioids, including:

- Heroin
- Morphine
- Oxycodone (OxyContin®)
- Methadone
- Fentanyl
- Hydrocodone (Vicodin®)
- Codeine
- Hydromorphone
- Buprenorphine

More information can be found at www.cdc.gov/drugoverdose/featured-topics/naloxone.html

What are fentanyl test strips?

Fentanyl test strips (FTS) are a low-cost method of helping prevent drug overdoses and reducing harm. FTS are small strips of paper that can detect the presence of fentanyl in all different kinds of drugs (cocaine, methamphetamine, heroin, etc.) and drug forms (pills, powder, and injectables). FTS provide people who use drugs and communities with important information about fentanyl in the illicit drug supply so they can take steps to reduce risk of overdose.

More information can be found at www.cdc.gov/stopoverdose/fentanyl/fentanyl-test-strips.html

If you or anyone you know is in need of narcan or fentanyl test strips, please contact:
