What to expect when you call

A registered nurse will ask you questions about your health. Your registered nurse will talk with you and advise:

- If you need to see a doctor
- If you should go to the Emergency Room
- If you should care for yourself or loved one at home.

Calling Nurses Hotline can:

- Save you time and money
- Answer questions about your health
- Help you decide how to care for a sick child or family member

Call Nurse Hotline:

- Before going to the emergency room; a nurse can help to make sure the ER is your best option for care
- Before you go to the doctor or make an appointment; a nurse can help you prepare questions or discuss concerns for your next visit with your doctor.
- For advice on helpful self-care information

If you have an urgent (but non-emergency) medical situation and need professional help, simply call. The nurse will speak with you about your symptoms and direct you to the appropriate treatment. **No question is too minor, no concern too small.**

The nurses are often able to offer suggestions for self-care measures and to assist you in caring for yourself and your family. In addition, nurses can offer general health information on a broad range of healthcare topics.

The nurses are an immediate, reliable, and caring source of health and medical information, education, and support.
